Full Stack ◇ DevOps ◇ Cloud ◇ Generative AI ◇ Web3

EDUCATION

Bachelors in Engineering (2022 - 2026)
M.H. Saboo Siddik College of Engineering – Computer Science   7.7 CGPA

Higher Secondary (2020 - 2022)
R.V. College – Class XII th 72%

SKILLS

- JavaScript | React.js | Full Stack | Tailwind CSS | Bootstrap | TypeScript | Next.js | MongoDB | Firebase
- Git | AWS | Node.js | MySQL | Express.js | C | C++ | Git | GitHub | Postman | Netlify | Docker

EXPERIENCE

Freelance Project: Garuda Institute LMS   (Website | GitHub)

Built an LMS for Garuda Institute (1,000+ students) using Next.js (TypeScript), MongoDB, and Redis for caching.

PROJECTS

NoteSpace :   (Website | GitHub)

Built a Notion-inspired web app using Next.js, Firebase, Clerk, and Liveblocks, featuring real-time collaboration, multilingual translation, document-based chat, and rich text editing for seamless note-taking and team productivity.

Land Registry System Using Blockchain :   (Website | GitHub)

Built a blockchain-based land registry system with Solidity, Hardhat, Ether.js, and React, ensuring secure, transparent, and tamper-proof property transactions.

PromptBuy :   (Website | GitHub)

Built an AI Image Marketplace for buying and selling AI-generated images. Developed with Next.js (TypeScript), MongoDB, and Stripe for payments. Integrated DALL·E , MidJourney for image generation, using Clerk for authentication to ensure secure user access.

MCQ Generator :   (Website | GitHub)

Users can upload PDF/TXT files, choose a subject and difficulty level, and generate AI-powered MCQs instantly.

OPEN SOURCE CONTRIBUTION

server-fs-kit :   (npm | GitHub)

Developed an NPM package that automates project setup with a MongoDB connection and dummy user controller/routes using the command npx create-app-z. The package has 200+ downloads with 5 weekly downloads.
